Problem Solving for Week 33

1. Nancy Drew had 27 hand lenses. She wanted to put them into baggies with six in each baggie. Would she have any left over? How many?

2. Junie B. Jones has 8 bags filled with 7 gumballs in each bag. How many gumballs does she have?

3. SkippyJon Jones has to organize his *frijoles* that exploded out of his closet. He found 32 on the floor. If he put 8 in each bag, how many bags would he need?

4. Jack and Annie were organizing their books. If they had 28 books and only four shelves, how many books would go on each shelf if each shelf had an equal number of books?

5. Create your own division or multiplication word problem and solve it.
